| Portfolio: dito-bayu.vercel.app

## SUMMARY

---

A passionate Information Technology student with skills in software development, systems analysis, and information technology. Experienced in using programming languages such as PHP, and JavaScript as well as frameworks such as TailwindCSS, ReactJS, NextJS, Laravel. Have a strong understanding of basic concepts of information technology, MYSQL databases, and be competent in problem solving and result-oriented, with good interpersonal skills.

## EXPERIENCE

---

### **SANBERCODE – Online**

React JS Bootcamp (July 2022 – July 2022)

- Qualified as the best participant with the title "has mastered React JS Web Front End".
- Created a final project by implementing the consume API and advance React. Added create, read, update, delete (CRUD) features to the project.
- Using a version control system such as GIT.
- Implementation of advanced React JS features such as hooks, context as state management, components and props, and other libraries such as TailwindCSS, Axios, React Router.

### **HOUSE ILMU INDONESIA – WFA**

Web Developer (August 2023 – January 2024)

- Lead the website rebuild. Converting it from Wordpress to Fullstack Web using the Laravel PHP Framework and MYSQL Databases.
- Collaborate with other members in website development using the GIT version control system.
- Acted as a Backend Engineer in website creation by re-creating all existing features and adding integrated public form creation features to the website.

### **PT JAVA SOLUSI KREATIF – Solo, Indonesia**

Front End Developer Intern (December 2023 – February 2024)

- Contributed to the creation of an ERP project and succeeded in creating 4 features such as Auth, Stock Management, Finance Management, and Inventory Management in just 2 weeks.
- Collaborate with other members in website development using the GIT version control system.
- Using Next JS as the main framework and TailwindCSS as the CSS framework.
- Received a nomination for Best Intern during my internship.
